

Spring Security

Authentication vs Authorization

Basic Security

Single Sign On (Third Party Login)

OAuth2

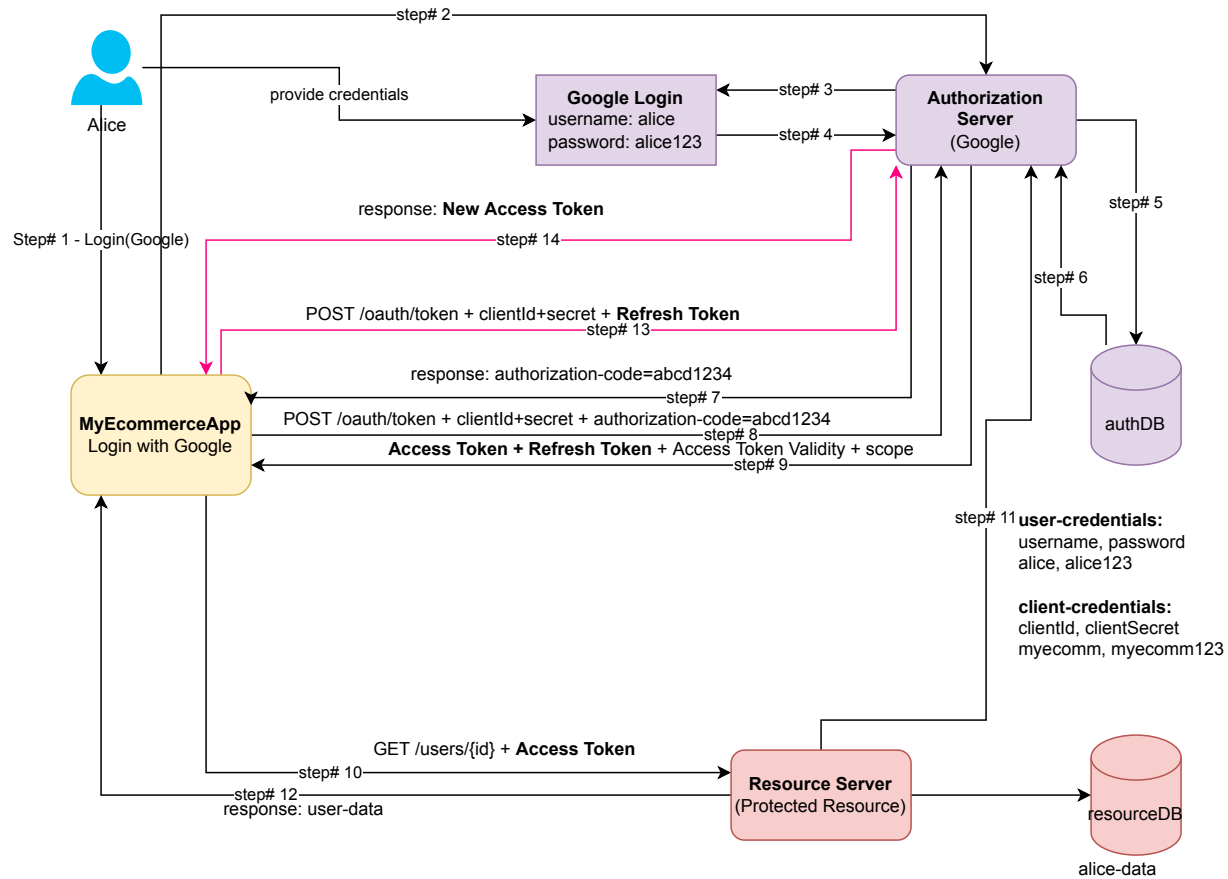

(SSO with Authorization Code)

OAuth2 Players:

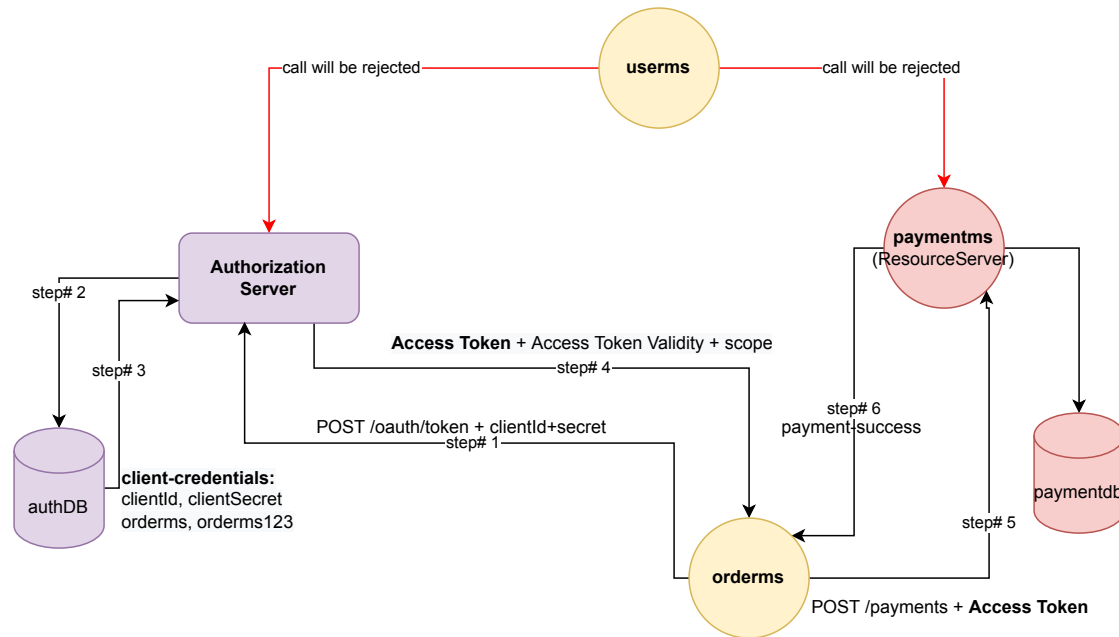

1. Resource Owner (Alice)
2. Client (MyecommerceApp)
3. Authorization Server (Google)
4. Resource Server (Google)

Grant Type:

1. Authorization Code (SSO)
2. Implicit (Deprecated)
3. Password
4. Client Credentials

OAuth2
Client Credentials
(Refresh Token is not supported)

Microservices (Bigger Picture)
