

Spring Boot

@ComponentScan

@Component
@Service
@Configuration
@Bean
@Controller
@RestController
@Repository

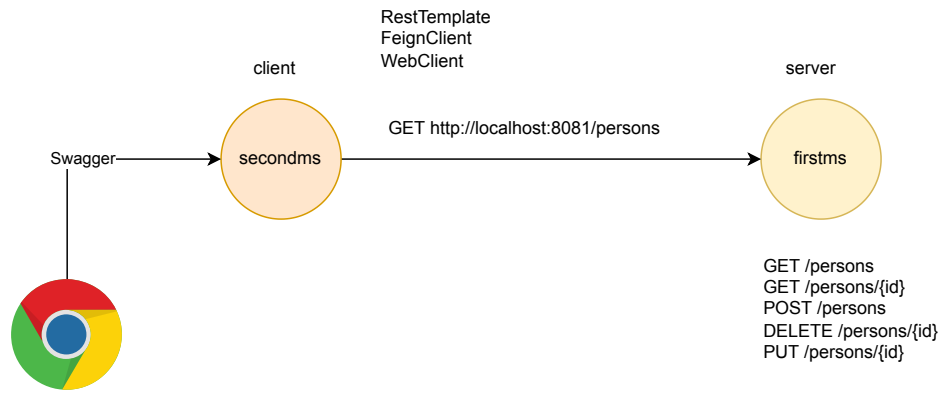

```
@Configuration
public class MyConfig {
    @Bean
    public MyService myService() {
        MyService myService = new MyService();
        myService.setName("abc");

        return myService;
    }
}
```

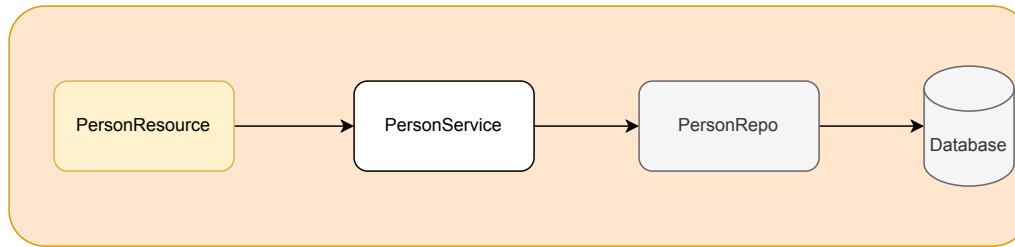

```
@Comonent
public class AnotherService {
    @Autowired
    private MyService myService;

}
```

Make JAR and not WAR!

Integration Test in Spring Boot
